Here is a Race of glorious Monarchs shown,
From whom great Anne derives her happy Throne.
The noblest Blood in Europe does combine,
To constitute our Royal Sovereign's Line.
O let it be each Subject's wish and Song,
Still to have such a Queen, and this Queen long.

Astrological Conjunctions or Observations, &c.

Having laboured under many troublesome and dangerous Transactions, for some Years past; We are now, by the blessing of God, arrived to the Year 1705. and 'tis to be feared the Peoples mind are now as much dissatisfied as ever; some pine for want of Trade, whilst others grumble against their Governours; but methinks it is the greatest of follies to suffer with Repining, rather than to be happy with content. Many pregnant Wits are now at work to bring about their designs, but blessed be God we remain Quiet at home, tho' we cannot (without being termed uncharitable, but grieve for the troubles of our Brethren abroad,

The Aspects this Month are mostly Benevolent, and things ingeneral seem to be at a stand at present, yet the Square of Mars and Mercury will make some Places and People uneasy; it may be some uneasy Spirits in Ireland and other places managed, the Senate or Nations is now in Consultation about the Affairs of the ensuing Year, and the Ambassadors of Princes are very busy, in accommodating Matters to that end.

Some News from foreign Parts, pray God it tend to the good of the Industrious Merchant, but uncertain news from many places, and many lying as well as flying Reports spread Abroad.

Let us not repine or murmur at the actions of our superiours, for who is it among us poor Mortals that can withstand the thing that must come to pass; if evil come upon us, we may thank our selves and our sins for it, but if good, then let us praise God for it, who is more Gracious and Merciful than we deserve. Many jealousies and fears, infused into mens brains by the means of a dissatisfied Crew, and the common people uneasie. Now a young Clerk under some disgrace. Mars is now with violent fixed Stars, and may bring heats and animosities in some places. God preserve the City of London, and forever defend her Inhabitants, both from Fires and violent Feavers this Year and forevermore.

There are five Conjunctions of the Planets this Month, and some of them very significant. About this time great Consultations about material Matters, and some fly pranks practised by persons of haughty Spirits. But the Conjunction of the Sun and Saturn, and that of Jupiter and Mars this Month, will put the Grandees of Nations upon some affairs of moment, for some noble heroick Spirits will appear more than ordinary active. No more Teague Plots I hope, but there are many evil Agents who secretly endeavour to disturb our peace, many Reports spread abroad, if I mistake not, but

Audito multa, loquere parca.

One may hear much, and speak but little.

but as to natural Operations, they are not improperly call'd for *Sub d.o semper agant*, is a true Motto; and not only this on of God himself, but the Learned *St. Austine* says, God Governeth Inferiour things by their Superiours.

And *Cardanus*: Sigm 2. Aphor. 58. tells us, that Heaven is the Father

Astrological Conjectures or
 or Observations, &c.

Here are no dangerous
 Aspects of the Planets this
 Month to Affright us, all
 things seeme to lye hush,
 at present, but many times
 after a calm, storms arise.
 Storms in the Macrocosme,
 and storms in the Micro-
 cosme, for many a man
 if not for profit, yet for re-
 venge, will work wile & darts
 tho' they suffer in the end
 for their Insolency.

Good news from abroad
 the Industrious Merchants
 meets with a good return:
 all Europe in general is now
 inclined to Peace, but there
 are many evil Agents who
 by secret endeavours hinder
 the matter.

For should the War end,
 many younger Brothers and
 indeed old spendthits may
 go h- ng themselves. For
 say they,

Labore Conperandus &c.
 We must get our Living by
 Labour, &c.

August 1821 XXXI Days

And this order (saith he) is that law of Nature, ad-
by God himself at the Creation, *Fiat esse, sit ita*, Let
so, and it was so. Hence the Prophet styles them
Statutes and Ordinances of the Sun, and of the Moon
Stars, Jer. 31. ver. 35, and 36; and Chap. 33. ver. 2
calls it God's Covenant with them.

This Month begins with a square of the Sun and Saturn, and Menaces some Affliction to a Person of great Rank, and some fly Villany is about this time upon the Stage, which time will discover, and then wo to the Actors thereof. Yet this Month in general seems to be more for Counsel than Action; the Heavens for the present seem very Harmonious; yet many do endeavour hard to promote their own Interest, and many other dissatisfied People there are, that care not which end goes foremost, yet will be doing, tho' they join with a party to their own Destruction. Therefore would every Man in his Station but mind his own Business; the World would be abundantly better than now it is.

12	M 2	1	23	or	or	or	This Month is usher'd in with a Conjunction of Mars and Mercury, in Libra, and it is not strange if we hear of some fly Exploits plaid, Libels persed, and the Religious Mobility disturb'd in their Brains; because they cannot bring their sinister Ends to bear. Some contests about Religious Matters, the proud Party is not willing to yield, but must have a Curb to their Bridle. Two eminent Ones seem to be at difference. A young Clerk is now under some disgrace, and the French King under some Affliction, both in Body and Mind. Ireland seems uneasy, but England seems to remain in a peaceable State, which I pray God continue to the World's end.

We are now by the Blessing of God arrived to the end of the Year 1705. as one Year. So one Generation passes away, and another comes, and Man passes away his days as a tale that is told. All things at present seem pretty quiet, yet some shiftings and turnings in Matters of State, one is ready to juggle out, another to make room for himself, self-interest being the only design of most Men now a days. Some young Clerk is now under the frown of his Superior, but many grave Persons will receive favour from their Prince or Governor, and thus I conclude the Observations of this Month and Year, with God preserve the Church, bless the Queen with a long Reign here, and an Eternal Crown of Glory hereafter. Amen.

♌ Breast, Stomach and Ribs
♍ Bowels and Belly.
♎ Secret Members,
♏ Knees.

♈ Arms and Shoulders
♉ Heart and Back
♊ Reins and Loins
♋ Thighs
♌ Legs

✕ The Feet.

The Characters of the Seven Planets.

♄ Saturn, ♃ Jupiter, ♂ Mars, ☉ Sol, ♀ Venus, ☿ Mercury
♁ Luna, ♏ Dragon's Head, ☿ Dragon's Tail.

Upon the Twelve Signs.

Y Majestick Aries, clad in's Golden Wooll,
Commands the Head and Face: The Zodiack's Bull
♉ Rules Neck and Throat: The Arms and Shoulders lie
♊ Subjected to the Zodiack's Gemini:
♌ Cancer the Breast and Stomach do obey,
♍ And Regal Leo o'r the Heart doth sway
His Royal Scepter, whilst the wanton Maja
♎ Claimeth the Belly: Reins and Loins are weigh'd
♏ By the Cœstial Libra. Secrets are
♐ The poisonous Scorpions: And the Thighs the share
♑ Of Sagittarius: But the Feeble Knees
♒ Fall to the Goat: The Legs are standing Fees
♓ Unto Aquarius: Whilst the Feet do bend
✕ Their steps to Pisces, and assign an E N D.

These Characters are no enchanting Tools
For crafty Knaves to bubble credulous Fools;
But Wise-men's Marks, that briefly represent
The severest useful Objects thereby meant.

Who knows them well, and can them right apply.

He is the true Groundwork of Astrology.

The Second Part of COLEY for 1705.

Since the Creation, and since Noah's Flood,
 the Author (sure) was not well understood,
 for their Accounts do so much disagree.

They cannot well be reconcil'd by me:
 "But what seems probable to bear true Date,
 "Shall here succeed as Chronicles relate.

COLEY's *Astrological Observations*

1795

IN this Age it is not hard to find a Tribe of Mal-
 Spirited Animals, that make it their business to
 Venom out of the sweetest Flowers: And others
 there be, which may as well be compared to Idle
 that will themselves do no commendable or good Action,
 suffer others, if it lie in their way to prevent it: but to
 covy the Happiness of any Man; nor make severe Reflex-
 on either their Person or Actions; to make sport of
 World, as now a-days is too common. But the
 Wonder is, why so many hot-brain'd Animals should
 prejudice against this so commendable a Science, since
 controlled by all those that deserve the Name of Philosoph-
 than so worthy, so sublime, nay, so heavenly and excellent
 Art, could not be raised wholly out of the Minds of our
 censors, as Ideas only of their Inventions: But that this
 Noble Science had its Original, as well as all other Sci-
 ences, from Almighty God, the Fountain of all Knowledge,
 Wisdom and Goodness, why may not we Astrologers
 cast up our Eyes to the glorious bespangled Canopy of Heav-
 en, and by daily Experience, examine its Motions and
 Powers, since we are inclin'd thereunto from a Nature
 ability, to be acquainted with these Venerable Lights:
 had but happy Opportunities for such Contemplations:
 but for the Credit of this harmless Art is such, that it
 Antagonists to oppose it: but the Ignorant, Malicious, or
 whose Genius leads them to Antipathy against it, with-
 due Examination of its Principles, it is an Art, I can-
 not offend none, if Men can but dispence with Human-
 ty. Thus the Stars may be said to incline, but not con-
 Mens Minds to Good or Evil, as was the Opinion of
 sanus, Pricillanus, Marck, and others, who look no
 than these Secondary Causes, and so concluded Pto-
 Astris, That Men are earthall'd to the Stars, and what
 edneis they do commit, they are compell'd so to by the
 fluences of the Planets; no, this is to bind the unlimited
 hovah under a necessary of Destiny, and set the Creature
 the Creator; so that it is undeniable, but that Men are
 inclin'd, but not compell'd to do Good or Evil by the

COLEY's Astrological Observations, 1705.

of the Stars, which brings me to consider the Sun's Entrance into the four Cardinal Points, or the four Quarterly Seasons of the Year. And first, I shall begin with,

II. The Winter Quarter,

R Sol's entrance into Capricornus, which happen'd on December 10. 1704 a little after 5 in the Afternoon, at which time 12 degrees of ♋ is upon the Mid-heaven, and a 14 degrees of Cancer ascends the Horoscope, Saturn is in the 12th degree in Taurus to the $\odot$ and ♄ but in $\square$ to ♊ and the Quarter is more proper for Councils than Action, and may prove, many hot heads being at work, in hopes to alter the welfare of the Nation. Some Female of Quality will have some affliction. The Senators of Nations are busie in striving and cutting out work for the next ensuing Year. In the Month of January some eminent Hero dies with some affliction, but one of the Long Robe meets with Prefecture. Mens minds in general seem uneasie, many complaints for want of Trade. Saturn's entrance into Taurus may make Ireland uneasie, and stir up the Jesuitical Party to mischief; and why may not Mars his transit thorough that Sign, be Dueling and Bloodshed in many places, especially in a Kingdom where there is a sort of People delights in Blood? In this Quarter becomes discord in Gemini, which is of ill import to London. I am in hopes the Merchants may receive good News from abroad, and before this Quarter be over we shall be in great readiness to assist our Friends and us, against the great Disturber of our Peace, who, God send good time, if he be again the Land of the Living, will be laid down, and give him a Reward due to his Merits. And will conclude this Quarter, and enter on the next, which

III. The Spring Quarter,

R Sol's entrance into the Sign Aries, which happens this Year on March 9. at 3 minutes past 12 at Night, at which time the 4 Cardinal Signs possess the Angles, Libra 19 degrees on the Cusp of the Ascendant, 29 of Cancer on the Cusp of the Mid-heaven, Aries 19 on the Cusp of the 7th House, and

25 degrees of *Capricornus* on the Cusp of the *Imum Coeli*, which time the Moon separates from a Trine, and applies to a Square of *Saturn* and *Mercury* to a Square of *Mars*; why may we not hear of many sly Practices, and sly Treacheries put forward, tho' in this Quarter brought to Light, and Contrivers brought to condign punishment? *Saturn* is on the Cusp of the eighth House in *Taurus*, and Astrologers say it denotes a Mortality among the larger sort of Cattel, may in some measure prove fatal to some Persons of Quality this Year, especially to those Countries subject to that Sign, whereof *Ireland* is one.

From *Jupiter's* possession in the ninth House, we may expect that Religion, and the worship of God, shall be encouraged, and that Merchants trading to Sea shall prosper in their undertakings; and also that Justice shall be impartially administered. *Mars* his possession in the Scheme, intimates disturbances both by Sea and Land, and this the rather, because he is disposed of by *Mercury*. Much talk of Armies moving to the Field this Quarter, but not much Action performed. The Kingdom of *England*, blessed be God, still continues in peace, notwithstanding the Malice of our Enemies, both foreign and domestick; the latter of which we stand in more danger of. God preserve this Realm from a contagious Plague, and stemp this Year and for ever.

Many Kings, Princes and Governors, seem uneasy, and their enemies threaten'd to the Eyes, as well as a Rot among Soldiers and other Cattel. It is the Opinion of many, that such Conjunctions and Oppositions are appointed by Divine Providence to manifest their Effects, not only in Courts and Palaces of Great Noblemen, but also on Families more inferior; yet you may hear of much thwarting in Councils, and contradicting one another; the Commonalty are fill'd with fears, and much muttering amongst unquiet Spirits. It is an Old Saying, *That all is well that ends well*, for Patience is a Flower that does not grow in every Garden. The Heavens indeed do but follow the Natural Inclinations of Men, and not their positive Actions; but a Man may see by the one, how far they would put the other into practice, were they not held by a Curb; for it has been the Divine Will of the Creator, from the beginning of the World, that all things Sublunary should be subject to change, and that their mutation should be govern'd by a Cause above them, that is, the *Celestial Bodies*; they be set in due Order from the Creation of the World, and

up their Courses in their several Stations without the least
variation. And this brings me to consider the next, which

IV. The Summer Quarter.

On the Sun's entrance into *Cancer*, which is this Year on
the 10th day of *June*, at 28 minutes past 7 after Noon,
which time 20 degrees of *Sagittarius* ascends the Horoscope,
24 of *Libra* culminates, and 5 of the 7 Planets are crowd-
ed in the 7th House. Now you will hear of some bustle in
the World, some will be advanced to Honour, whilst others
turned headlong into the Grave of Dispair. Some are so
ambitious, that they will strive to be King or Nothing; and
is not strange if we hear of many Cruelties committed in
many places of *Europe*. *England*, blessed be God, continues
at rest; some sport in the Field, and some strong Hold taken
by Storm or Surrender'd, to the advantage of the Allies. I
hope *Scotland* will learn to be easie. *Italy* is not free from
strages. Many *Scurrilous Pamphlets* dispersed abroad in this
Quarter, in the Month of *August*.—Person of Note meets
with a fiction in the face, and many fly and roguish Exploits
are told, yet there is hopes, notwithstanding the endeavours of
the turbulent Spirits, (of an approaching Peace) between
the Nations and People now at difference. Some drive on
boldly to their own Destruction, whilst others look on,
doubting what to do. Some grope in the dark, after a
faded Light, and when they have found it, it is darker
than Hell it self. Some rake after Honour, whilst others,
down to the height of Pride, hang themselves, thinking
the World too little to contain them. Thus goes the Affairs
of this World, some are mad because they cannot reach to
the height of Honour, others mad because they have it not
themselves; even like *Caius Caligula*, who was so ambi-
tious as to wish the People had all but one Neck, that so he
might have the Glory of giving the bravest blow that ever was
struck, yet he himself at the last was murder'd, receiving
many wounds in his Body by the Conspirators. And this
brings me to the Consideration of,

V. The

V. The Autumnal Quarter,

OR Sol's entrance into *Libra*, which this Year is on the 12th day of September, at 37 minutes past 8 in the Morning, at which time 27 degrees of *Libra* ascends *Lro* on the *Medium Cœli*, 27 degrees of *Aries* on the Cusp of the 7th House, and 6 of *Aquarius* on the Cusp of the 10th, or 4th House. At the Trine of the Ingress *Jupiter* squares *Mercury*, and *Saturn* and *Jupiter*, within the Orb of their first Sextile, the Sun in Conjunction with *Mars* on the 11th, upon the Cusp of the 12th, and *Saturn* in square with *Venus*, he in *Taurus*, and she in *Leo*; and thus stands the figure of this Ingress, from whence we may judge, that *Saturn*'s being in *Taurus*, retrograde will give some trouble to *Ireland*, and animate the Rapparee Party in that Kingdom. The Sextile of *Saturn* and *Jupiter* may compose some Differences, *Jupiter*'s Square to *Mercury* will raise some Repellances, and those various, perhaps some secret Evil acted, but the Actors beware. *Saturn*'s Square to *Venus* gives rise to a Liddy of Note. Some of the Starch-faced Religious will find themselves griev'd, it may be, without a Cause. Some of great Rank can't agree, (What's the matter?) Have we got more Money than Manners? Let them have a care, there is one in this World yet above them, that is able to curb their Pride. The Opposition of *Saturn* and *Mercury*, in the beginning of *November*, at the time of the Eclipse of the Sun, will put forward the Effects; and some Parts both of *France* and *Spain* may be made sensible of it. Many Tricks acted, and some sly Exploits discovered, notwithstanding the Opinion of so many, who do affirm that the Stars have no Influence over Humane Bodies, or things of this *lunary*. And the great Sir *Walter Rastigh* would often say that it could not be doubted but the Stars were of a greater and more excellent Use than to give an obscure Light, or for Men to gaze on after Sun-set, It being probable, that the same Goodness that endued the meanest Bird with some Virtue, deny'd not a Body'd proportional Power to those glorious Bodies, which are created, without question to the same end in Heaven, that Plants, Flowers, &c. are in the Earth, not only to adorn, but to serve it, according to this following Stanza:

OLEY's Astrological Observations, 1705.

Eller I believe that the Arch Architect,
With all these Fires, the Heavenly Arches deck'd
Only for us; and with these glittering Shields,
To amaze poor Shepherds watching in the Fields.
I'll never believe that the light Flower that pranks
Our Garden Borders, or the Common Banks,
And the least Stone, that in her warming Lap
Our kind Nurse Earth doth consciously wrap,
Hath some peculiar Virtue of its own,
And that the glorious Stars of Heaven have none,
But shine in vain, and have no Charge precise,
But be walking in Heaven's Galleries,
And through that Palace up and down to Clamber,
As golden Gulls about a Prince's Chamber.

VI. Of the Eclipses this Year 1705.

According to Calculation, will be but two, and
those both of the Sun, yet neither of them will appear
visible in our Horizon.

The first of these Solar defects happens on the 11th
day of May; the beginning will be about Sun-set when
and therefore by consequence cannot be seen here, but
if the Air be clear, be seen in the more Southern Parts
of the World, as in the Strights of Magellina, &c.
The second, of the Sun, is in November 5. near Two in
Afternoon, but invisible also, but may be seen in some
part of France and Spain, as well as in some remote Southern
countries. And so much for the Eclipses of this Year.

VII. Besides these Eclipses, there happens this Year a
conjunction of Saturn and Mars, in the latter end of Aries,
the 9th day of January, about 10 at Night; this will put
forward some private Contrivance in order to Mischief. I
per Plotting is out of fashion; it signifies breach of Leagues
and Promises among great ones, and set many untoward
matters on foot, especially in those Countries subj'd to the
loss of their possession, &c.

There

COLEY'S *Astrological Observations,*

There happens also a Conjunction of *Jupiter* and *Mars* the 8th day of *April* this present Year, in about 21° of *Gemini*, at 18 h P. M. or the 9th day about 6 in the morning, which you please, and the Moon applying to a close them both. This is no Cordial for the City of *London*; nor any close Consultations among the Ministers of State; nor it tend to the good of the Nation, and then it will be God preserve the Glorious Queen of *Great Britain*, and her Victory over all her Enemies, &c.

Again, on the 16th day of *November* this Year, happens an Opposition of *Saturn* and *Mars*; *Saturn* is retrograde in *Scorpio*, and *Mars* in *Scorpio* his own House. This will be chief on foot to purpose, and the Jesuitical Crew, as the Rapparee Parcy in *Ireland*, will feel the Effects of this position; they cannot be quiet, tho' they smart for this; besides *Russia*, the Greater *Poland*, *Sweedland*, &c. so *Bavaria*, *Catalonia*, and some Parts of *Spain*, must be to share in the Effects of this Opposition, but let time manifest it. And so much for the Judgments of this Year, I conclude thus: Knowest thou the Course of the Heavens, canst thou set the Rule thereof in the Earth? *Job 38. v. 32.* It is the great God of Heaven and Earth that gives Power to the Heavenly Bodies to Rule, as Secondary Causes over the Sublunary, to whom all Praises is due both now and for ever more. Amen

And so much for the Year of this Year. Besides these Eclipses, there happens this Year an Opposition of *Saturn* and *Mars* in the latter end of the month of *January* about 10 at Night; this will be chief on foot to purpose, and the Jesuitical Crew, as the Rapparee Parcy in *Ireland*, will feel the Effects of this position; they cannot be quiet, tho' they smart for this; besides *Russia*, the Greater *Poland*, *Sweedland*, &c. so *Bavaria*, *Catalonia*, and some Parts of *Spain*, must be to share in the Effects of this Opposition, but let time manifest it. OLEY'S *Astronomical Observations*, 1705.

The Explanation and Use of the preceding Tables
of the Pleiades and Fixed Stars, &c.

The Table of the *Pleiades*, or *Seven Stars*, containeth
Columns, the first towards the Right Hand Expresseth the
day of each Month, as 1, 6, 11, 16, 21, 26: The se-
cond sheweth their Rising in hours and minutes: The third their
Setting: The fourth their Southing, as is plain by their very

Now observe, the Letter (a) denotes Afternoon, and
before Noon, or Morning. And (b) likewise in the 5, 6,
Columns the same; from the 8th day and from is con-
sidered their Rising, Setting and Southing, to be plain to the
best Capacity. As for Example, viz.

Suppose I desire to know the Rising, Southing and Setting
of the *Pleiades* or *Seven Stars*: On January 21. I find by the
Table they rise 16 min. after 10 before Noon, South 32 min.
6 Afternoon, and Set 48 min. past 2 morning. And so
on the 6th of August they rise 29 min. past 9 after Noon,
at Night they South 45 min. past 5 Morn. (as the letter M
denotes) and they Set 1 min. past 2 after Noon, &c.

In the second Table of the Fixed Stars, there are 7 Col-
umns, 1. The Names of the Stars. 2. Their Rising. 3. Their
Setting. 4. Their setting either before or after the *Pleiades*.
5. Their Latitude. 6. Their Magnitude. 7. Their Natures
or Title direct. In the Columns of Rising, Southing
and Setting, is expressed how many hours they Rise, South
Set, either before or after the *Seven Stars*, as the letters
(a) and (b) denotes.

EXAMPLE.

Suppose I desire to know the Rising, Southing and Setting
of the *Pleiades* or *Seven Stars*, South the 21st of January.
I find by the Table they rise 16 min. past 6 at Night. And in the second Table, I find
that *Syrus*, or the great Dog-Star, South 3 hours 3 min. af-
ter them; which added to 6 hours 32 min. the Southing of
the *Seven Stars* at that time, the Sum is 9 hours 35 min. or
